EDUCATION

Maharaja Institute of Technology, Mysore Sep 2023 – Aug 2027
Bachelor of Engineering in Information Science & Engineering CGPA: 8.85 / 10

EXPERIENCE

App Development Intern Jul 2025 – Aug 2025
Runshaw Technology Pvlt. — E-Learning Providers, Bengaluru,

- Engineered **responsive, production-ready mobile interfaces** using **Flutter**, applying advanced state management and performance optimization techniques.
- Utilized **Android Studio** for end-to-end Android app development including debugging, emulator testing, and integration of platform-specific features.
- Applied advanced **Dart** concepts to build modular app architecture, reusable components, and clean code, reducing development time by **30%**.
- developed a **World Currency Converter Application** using **Flutter and Dart** which include API intergration for real time currency. .
- Exchange rates, UI/UX implementation for smooth user experience.
- Hands on practice with mobile app development using Kotlin and Flutter Learning and applying principles of mobile app development.
- Delivered **2 fully functional mobile applications** within a 8-week internship cycle, meeting all project milestones on schedule.

PROJECTS

1. **Automation For Criteria 4 |** React, Node.js, MongoDB, supabase

- The Project automation for criteria 4 is a web based system that **automates calculation, presentation and export of academic success-rate metrics** for undergraduate cohorts.
- It integrates student-level records (**semester results, backlog cleared flags, admission details**) with authoritative summary documents to compute institutional key performance indicators such as admitted count(X), graduated count(Y) for both “without backlog” and “stipulated period” definitions.
- The system provides an auditor-friendly view showing per year breakdowns (LYG,LYGM1,LYGM2)
- Deployed a **live web application** enabling real-time inference.

2. **Titanic Survival Prediction Web App |** Python, pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- The goal was to build a classification model that analyzes historical passenger data and predicts survival using machine learning techniques.
- Developed a machine learning web application that predicts whether a passenger would survive the Titanic disaster based on input features such as age, gender, passenger class, fare, and family details.
- The application is deployed using Streamlit for interactive user input and real-time prediction.

3. **AI Vision Pro |** Python,Streamlit,OpenCV,YOLOv8 (Ultralytics),Tesseract OCR,NumPy,gTTS (Google Text-to-Speech),Pillow (Image Processing)

- AI Vision Pro is an AI-powered image analysis web application built using Python and Streamlit.
- The application allows users to upload images and perform object detection, text extraction (OCR), and image enhancement using computer vision techniques.
- **Project Features:** Upload single or multiple images, Extract text from images using Tesseract OCR, Detect objects using YOLOv8 model, Convert detected text and objects into speech ,Apply image filters such as grayscale, blur, sharpen, and edge detection, Maintain analysis history, Interactive user interface using Streamlit.

TECHNICAL SKILLS

Languages:	Python, C , Dart, JavaScript, SQL, HTML/CSS, Kotlin, TypeScript
Frameworks:	React.js, Node.js, Flutter, Flask, FastAPI, Next.js, Tailwind CSS, Bootstrap
Dev Tools:	Git, Android Studio, VS Code, Docker, Firebase, Google Cloud Platform, Anaconda
Libraries:	TensorFlow, PyTorch, OpenCV, Pandas, NumPy, Matplotlib, Scikit-learn
Databases:	MySQL, MongoDB, PostgreSQL, Firebase Firestore

CERTIFICATIONS

Artificial Intelligence Fundamentals · IBM | Nov 2025

Introduction to Data Science · Infosys Spring Board | mar 2026

IBM Machine Learning

Introduction to Generative Advarsial Network · Linkedinlearning | May 2025

Start Writing Prompts like a Pro - Google | Nov 2025

AI For EveryOne – DeepLearning.AI | Oct 2025

AWS Cloud Practitioner Essentials – Amazon Web Services | Oct 2025

Software Engineer Certificate · Hacker Rank | 2026

Start Your API Testing Journey With Postman Tool – Coursera | Nov 2025

Getting Started with Git and GitHub – IBM | Apr 2026

EXTRA CURRICULAR ACTIVITIES

- Campus Ambassador at GSSOC’25
- Technical Co-ordinator in Infosphere Club
- Participated in hack infinity Hackthon 2025 .
- Member of GDG
- Contributor of Open Souce Connect India(OSCI’25)
